

# Elmurodov Jamshid

## Junior Java Backend Developer

Tashkent City | [GitHub](#) | [LeetCode](#) | +998 99 743 5678

## EDUCATION

PDP Academy (Java Backend Bootcamp) 11/2023 – 11/2024

## Project

Donation Platform for Streamers – [Backend GitHub](#), [WebSite](#)

*Technologies: Spring Boot, RESTful API, PostgreSQL, JWT Security, WebSocket, JUnit (80%), Payment Integration (Click, MirPay)*

- Developed a real-time donation platform that allows users to donate to streamers, with live updates on their streams.
- Implemented secure user authentication using JWT tokens, integrating Telegram OAuth2 for login.
- Integrated WebSocket for real-time updates, ensuring donations are instantly visible during live streams.
- Built a robust backend using Spring Boot and PostgreSQL for efficient data management.
- Integrated payment gateways (Click, MirPay) for seamless donation processing and withdrawal by streamers.
- Developed comprehensive test coverage using JUnit to ensure reliability and maintainability of the platform.
- Designed the system to charge fees on both donations and withdrawals, providing a sustainable business model.

## SKILLS

- Languages: Java
- Frameworks: Jakarta EE | Spring (Boot / Data / JPA / Security / JDBC)
- Databases: PostgreSQL, MongoDB
- Build Tools: Maven, Gradle
- Testing: JUnit, Mockito, Integration
- Version Control: GitHub, GitLab
- Principles: OOP, SOLID
- Tools: Docker
- Algorithms and Data Structures ([LeetCode](#))
- WebSocket, CI/CD, AWS
- Microservices, Eureka, Kafka
- DB Migration: Liquibase

## LANGUAGES

- English (intermediate)
- Russian (beginner)
- Uzbek (Native)
